

**GMV West High Rise Blocks - Alamaro, Becquerel, Da Vinci, Faraday, Farnsworth,
Holly, Maurer, Metcalfe, New Becquerel and Newton**

Building Safety Fund - Update on Developer Remediation Contract

Please find attached a letter from the Department for Levelling Up, Housing & Communities received 29 June 2023. This confirms that the applications by GMV Management Ltd (GMVML) for funds to remediate External Walls on the above blocks have formally transferred from the Building Safety Fund (BSF) to the Developer (GMVL) under the Developer Remediation Contract and the Developer will now cover all life critical fire safety defects.

As previously advised, intrusive testing is in progress to complete a Fire Risk Appraisal of External Walls (FRAEW) according to PAS9980 for the above blocks. Following this the developer will be in a position to confirm the scope of their works and confirm a timeline to us.

All leaseholders impacted by the cladding crisis have been continually frustrated by the slow pace of progress over the last few years.

The Board of GMVML are aware that some leaseholders have raised concerns about the pace of remediation works at GMV West in comparison to other buildings. We have sought guidance from our local Member of Parliament, Mathew Pennycook, who is also the Shadow Minister of State for Housing and Planning, who has been closely following this important topic. Following his response, (copy attached) we are reassured that, whilst this remains a complex and dynamic topic, we are well placed to progress, compared to others in his constituency and further afield.

Further updates will be provided once more information is received from the developer on how they intend to comply with their remediation obligations to us.

Board of GMV Management Ltd
