TITLE: Greenwich Millennium Village awards 30-year heat network contract to Switch2 Energy

PUBLICATION: Switch2 Energy News

DATE: Monday 1 August 2022

AUTHOR: Lucy Glynn (Marketing Manager)

FULL CONTENT:

Greenwich Millennium Village Limited (GMVL) has selected Switch2 Energy to provide retrofit design and build, operation and maintenance of its Greenwich Millennium Village heat network – as part of a 30-year ESCo partnership.

Located a short walking distance from the Millennium Dome, GMVL is a joint venture between Taylor Wimpey and Countryside Properties.

EXISTING NETWORK:

The existing heat network serves phases 1 and 2 of the development and was originally built between 2000 and 2009. It provides heating and hot water to over a thousand homes and uses a matrix of energy centres, plant and equipment that is out-dated and now difficult to maintain.

SWITCH2'S SOLUTION:

Switch2 has devised an innovative solution to upgrade and replace existing energy centres and other equipment, while ensuring uninterrupted heat and hot water supply to residents. This will:

- Transform efficiency
- Reduce carbon emissions by 150 tonnes per annum (equivalent to carbon offset by a 178-acre forest in one year)
- During retrofit: on-site resident liaison officer to support customers

Switch2 will take on responsibility for all aspects of maintaining and operating the heat network – providing a reliable, efficient and affordable supply of low carbon heat and hot water to residents. This

involves all heat metering, including smart meters in homes, to manage accurate and transparent resident billing.

TECHNOLOGY:

Switch2 will deploy its 'Decarbonise, Operate and Maintain' solution, which includes Internet of Things (IoT) optimise technology to enhance performance of the GMV heat network. Digital energy management platform uses remote connectivity and advanced data analytics for real-time visibility of the entire network.

QUOTES:

Chris Genner, Project Director for Greenwich Millennium Village Limited: "We're committed to delivering green and affordable energy to the residents at phases 1 & 2 and are pleased to be working with Switch2 to realise our sustainability vision and deliver the highest standards of service to our residents and customers."

Simon Eddleston, Construction Director Switch2 Energy: "We're proud to partner with GMVL and will draw on our 35-years of designing, building and managing heat networks – putting our customers' needs first to deliver this prestigious ESCo project. We will make use of our advanced digital technologies to optimise the design, operation and metering process – helping us to maximise performance, drastically reduce carbon emissions and deliver excellent service to residents."

COMPANY INFO:

Switch2 Energy Ltd, Company No. 02409803
Registered: The Waterfront, Salts Mill Road, Shipley, West Yorkshire, BD17 7EZ
Serves 85,000 residents and 200 clients across 500 heat schemes.
